Article Summary

An objective comparison of every major SVG pattern library, generator, and tool with real usage examples.

Build vs Buy Decision

The decision framework: (1) Need a standard geometric pattern quickly use SVGeneration or Hero Patterns. (2) Need a custom branded pattern start with a tool for the geometry, then customise in code. (3) Need photographic texture use a texture library (Textures.js, Subtle Patterns). (4) Need animated or interactive patterns build custom with CSS/S MIL. (5) Need maximum creative differentiation design from scratch in Inkscape or Figma .
